Report on Two Weeks Innovative Project at CESI-France

Being a collaborative organization of MUJ, CESI-France provided an opportunity to students of MUJ to work on innovative projects. The projects were a good initiative to incline students towards entrepreneurship which started on 17th June 2019 at CESI France. It was completed with fruitful outcomes on 28th June, 2019.

9 students from MUJ availed the opportunity of working on these projects.

The students shared their positive feedback about the program. The program enhanced their learning in finding the versatile solutions for the real world problems in different domains namely digital, involving programming, IOT and data science. The students attained the skills to build a proof-of-concept, evaluating it with potential users and refining the business model.

It's an honor for MUJ that our students were successful in creating a remarkable impression on the French team. The visit proved its worth in terms of establishing a harmonious communication among students of MUJ and CESI, irrespective of the academic and cultural differences.
