

## **Manipal University Jaipur Initiatives for Conservation and Sustainable use, conservation and restoration of Land**

Manipal University Jaipur fosters awareness and actively participates in efforts to conserve and sustainably utilize land, including forests and wild areas. Recognizing the urgency of addressing environmental challenges, Manipal University Jaipur stepped up efforts to organize events and initiatives aimed at promoting conservation and responsible land use. Manipal University Jaipur supports and organizes events that contribute to the preservation of our natural resources.

One of the fundamental ways in which Manipal University Jaipur contributes to conservation and sustainable land utilization is through education and research. Manipal University Jaipur provides students with the knowledge and tools to understand the complex ecological systems that govern our land. Manipal University Jaipur hosts conferences and seminars focused on conservation and sustainable land utilization. These events bring together experts, scholars, and activists from various fields to discuss pressing issues, share knowledge, and propose solutions. These gatherings serve as platforms for networking and collaboration among individuals and organizations committed to environmental conservation. Students, often at the forefront of environmental activism, are encouraged and supported by the university to launch its own conservation initiatives. These initiatives range from reforestation projects to wildlife conservation efforts. Manipal University Jaipur offers resources, mentorship, and funding opportunities to empower students to make a meaningful impact on land conservation. Manipal University Jaipur frequently engages with local communities to raise awareness about the importance of land conservation. They organize outreach programs, workshops, and educational events that involve community members in conservation efforts. Collaboration is key to tackling complex environmental challenges. Manipal University Jaipur often establishes partnerships with government agencies, non-profit organizations, and industry leaders to leverage resources and expertise. These collaborations result in more comprehensive and effective conservation efforts. To lead by example, Manipal University Jaipur adopts sustainable practices on the own campuses. This includes rewilding portions of the campus, implementing energy-efficient technologies, and promoting sustainable land management practices. These initiatives demonstrate the institution's commitment to the cause and inspire students and staff to adopt environmentally friendly habits.

17,500 + plants and trees across the campus to maintain sustainable use of land and construction
