

Sustainable Commuting Targets and Measures

Manipal University Jaipur is actively engaged in promoting sustainable commuting practices among its students, faculty, and staff. Through the implementation of various initiatives and the establishment of targets for walking, cycling, public transportation, and other non-motorized or low-emission alternatives, the university is playing a significant role in fostering a greener environment and enhancing the health and vibrancy of campus life. By prioritizing sustainable commuting, Manipal University Jaipur serves as a model for the wider community, encouraging individuals and groups to adopt more environmentally friendly transportation options.

Manipal University Jaipur actively advocates for sustainable commuting practices and highlights the advantages of these initiatives. Commuting is responsible for a considerable share of carbon emissions in various areas. By endorsing sustainable transportation methods, Manipal University Jaipur significantly contributes to the efforts against climate change. This approach to commuting is in harmony with the university's overarching sustainability objectives, nurturing a culture of environmental stewardship among students, faculty, and staff. The university encourages walking, cycling, and other active commuting options, which not only promote physical health but also alleviate stress and improve the overall well-being of the campus community. Manipal University Jaipur supports alternative transportation methods, which aid in alleviating traffic congestion and its related challenges, such as air pollution and delays in travel. The university has made investments in pedestrian and cycling infrastructure, including dedicated bike lanes, bike racks, and pathways designed for pedestrians, thereby enhancing the safety and convenience of these commuting options. Additionally, Manipal University Jaipur facilitates carpool and vanpool initiatives to promote ridesharing among students and staff, often providing designated parking spaces for carpool vehicles. The installation of electric vehicle charging stations on campus further encourages the use of electric vehicles, contributing to the reduction of greenhouse gas emissions.

The implementation of sustainable commuting alternatives has led to a notable decrease in carbon emissions, fostering a more sustainable campus and environment. Both the university and its commuters can experience financial benefits through reduced fuel and parking costs when opting for sustainable transportation methods. Promoting sustainable commuting also cultivates a sense of community and shared values among members of the campus.

Promoting Sustainable Transportation for a Greener Campus at MUJ: Manipal University Jaipur actively encourages students, faculty, and staff to adopt sustainable transportation options, such as car-sharing, cab pooling, and using government transport, as part of its commitment to environmental sustainability. By promoting these eco-friendly practices, MUJ aims to reduce carbon emissions, decrease traffic congestion, and contribute to cleaner air on campus and in surrounding areas. This initiative not only reflects MUJ's dedication to fostering a greener campus but also instills a sense of environmental responsibility among its community.

members, inspiring them to make sustainable choices that support both the environment and society.

Shuttle Services: Manipal University Jaipur provides a designated government transport pickup point on campus for the convenience of faculty, staff, and students. This initiative supports accessible, eco-friendly commuting options, making travel to and from the university more efficient and sustainable. By offering this service, MUJ reinforces its commitment to promoting environmentally responsible transportation choices.

Introduce on-campus shuttle services or collaborate with local transport providers to ensure convenient and eco-friendly commuting options.

- 26 number shuttle bus by state govt. bus service
- Other private sharing bus services

Designated Parking for faculty and staff

Carpooling Programs: Facilitate a carpooling system among students and staff. This not only reduces the number of vehicles on the road but also promotes a sense of community.

Student

I recently discovered MUJ Central, and I am blown away by the quality and depth of the materials that are available. As someone who is constantly looking for ways to improve and learn new things, I was amazed by the vast resources like PYQ's and e-books that are offered on the site. I highly recommend this website to anyone who is looking to expand their knowledge and grow as an individual. It truly is a valuable resource.

Divya Dubey

Walking Paths: Develop safe and well-lit walking paths within the campus to encourage people to walk rather than using motorized transportation for short distances.

- In Academic campus
- In Faculty housing
- In Hostel campus
- Outside university premises

Electric Vehicle Charging Stations: Install electric vehicle charging stations on campus to promote the use of electric vehicles among students and staff.
