Application for Scriber

Please fill up the DECLARATION and submit the same to Exam Section

DECLARATION

1. We, the undersigned, Mr/Ms,.....

Registration number..... Department..... and

Mr./Ms..... Writer (scribe) for the eligible student, do hereby declare that: -

a) The scribe is identified by the student at his/her own cost and as per own choice. The student is blind/low vision or affected by cerebral palsy with loco-motor impairment, or other neurological disorder because of which his/her writing speed is affected permanently for any reason, and s/he needs a writer (scribe) as per law governing them and guidelines issued by the competent authorities in this regard.

b) As per the rules, the student availing services of a scribe is eligible for compensatory time of 20 minutes for every hour of the examination.

c) The medical certificate furnished by the student is issued by competent authority and is the latest one.

d) We jointly understand that the scribe shall only record the answer as suggested by the student and shall not import his/her knowledge/make any gesture/sound or movement to indicate correctness or otherwise of any answer.

e) We undertake to comply with the directions of the invigilator at the Examination room and try not to disturb other examinees.

f) Highest qualification of scribe is XII Standard or equivalent and Copy of Marksheet/ Certificate is attached herewith.

g) Any misconduct committed by the scribe shall amount to a misconduct committed by the student who is using the Scribe and is liable for disciplinary action as may be deemed appropriate.

h) We hereby declare that all the above statements made by us are true and correct to the best of our knowledge and belief. We also understand that if at any stage we do not fulfil the eligibility norm and/or that the information furnished by us is incorrect/false or that we have suppressed any material fact(s), the examination of the student will stand cancelled.

Equivalence of CGPA with percentage of marks

At the Manipal University Jaipur the overall performance of a student is indicated by Grade Point Average (GPA) of a semester and Cumulative Grade Point Average (CGPA), the weighted average of GPAs of all semesters that the student has completed at any point of time. The grades are awarded based on relative performance and it has no correlation with any fixed percentage of marks obtained. Though it is not possible to convert CGPA to aggregate percentage of marks, based on demand of Industries/organizations the following conversion factor was approved by the MUJ Academic Council.

Percentage: $CGPA \times 10$

ABSTRACT:

Nanoalloy clusters offer remarkable physical and chemical properties, as it can be tuned by proper control of size, composition and structure. A number of scientific reports describe the effects of size and structure which change the electronic, optical and other physico-chemical properties of nanoalloy clusters. A deep insight into the research of nanoalloys with well-defined size and structure may lead to some other alternatives for much better performance. The transition metals of group 11 in the periodic table are of immense importance due to their significant electronic, optical, magnetic and catalytic properties. The positive conjoint effects of two or more noble metals on the above mentioned properties have been lucidly explained by researchers. Nowadays, different compositions of nanoalloys are utilized for advancement of methodologies and characterization techniques. Group 11 metal clusters (Cu, Ag and Au) exhibit the filled inner d-orbitals with one unpaired electron in the valance s-shell. This electronic arrangement is responsible for reproduction of exactly similar shell effects which are experimentally observed in the alkali metal clusters. The structural, electronic and optical properties of bimetallic Cu-Ag, Ag-Au, Cu-Au clusters invoking Density Functional Theory (DFT) based descriptors have been computed. We have also studied the conformational effect of these clusters by using DFT methodology. Density Functional Theory is very well known and most efficient technique of quantum mechanics to study the electronic properties of materials. Conceptual DFT based descriptors have turned to be an indispensable tools for analyzing and correlating the experimental properties of compounds.

INSTRUCTIONS TO THE CANDIDATES

1. Make all due entries on the cover page very carefully, only at the space provided for the purpose.
2. Students should read the question paper and the instructions carefully before writing their answers.
3. Write the question number clearly in the left margin of the answer book.
4. Rough work done must be crossed out clearly and this will not be read by the examiner.
5. USE OF WASH-ROOM WILL NOT BE ALLOWED except under emergent circumstances.
6. NO SUPPLEMENTARY ANSWER-BOOKS WILL BE ISSUED. Write on both sides of the paper. Do not waste pages unnecessarily.
7. Possession of mobile phones, programmable calculators and other similar electronic gadgets is treated as malpractice. However, use of scientific calculator is permitted.
8. No paper is to be brought in the examination hall for scribbling on. Cases of students found talking, copying or using any type of unfair-means in or outside the examination rooms will be dealt with in accordance with provision of the use of unfair-means rules framed to such effect by the University.
9. Students must check their pockets, surrounding and ensure that no objectionable materials are present.
10. No student shall be allowed to enter the examination hall after 10 minutes from the commencement of examination.
11. No student shall be allowed to leave the examination hall before half an hour from the commencement of examination.
12. After finishing the exam, handover your answer book to the Room Superintendent/ Invigilator. DO NOT LEAVE IT ON THE TABLE.
